SUMMARY

Product manager with 5 years of experience across direct-to-consumer, B2B, and internal tools. I've taken products from 0 to 1 and through scale, specializing in media supply chain platforms and VOD apps across 7 device platforms. I lean on strong prioritization frameworks and use AI to improve collaboration with designers, engineers, and stakeholders.

EXPERIENCE

Product Manager | Wonder Project, Los Angeles, CA

Apr 2023 – May 2026

- Built Wonder Project's media supply chain from 0 to 1, designing the delivery, ingestion, and metadata architecture (Aspera, S3, Brightcove, Cloudinary) that has processed 3000+ hours of licensed and original content to date
- Led cross-functional technical onboarding for the Amazon Prime Video Channel launch, closing spec gaps in XML generation, timed text, and A/V to meet Amazon's certification SLAs — enabling a channel now generating \$X.XM in MRR
- Owned 5 core features (Profiles, Downloads, Sign Up, Subscription Lifecycle, Settings) for a 7-platform SVOD app (Roku, tvOS, Fire TV, Google TV, iOS, Android, Web) from concept to feature-complete beta, coordinating 3 designers and 21 engineers and grounding decisions in 50+ hours of competitive and customer research
- Defined and iterated the first delivery spec detailing A/V, timed text, artwork, and 80+ parameter metadata schema in response to studio partner feedback, establishing the spec that every studio partner has onboarded against
- Drove legal product strategy for compliance with CCPA, GDPR, and VPPA, architecting a custom build that extended a low-cost vendor tool to deliver full consent management, DSAR workflows, and privacy preference controls
- Adopted Cursor and Claude Code into the product development workflow for media supply chain enhancements, cutting time from ideation to working prototype by 50%

Project Manager, Scientific Programs | Sensor Bio, Los Angeles, CA

Jan 2021 – Nov 2022

- Drove two white-label clinical research products from discovery to delivery for a Fortune 500 pharma client, leading requirements gathering, defining scope within platform constraints, writing engineering specs, and owning QA through launch — \$1.6M in contract value.
- Structured and ran a 40+ prospect pilot for a SaaS remote monitoring product, achieving a 63% prospect-to-paid conversion and \$17K in new MRR

Associate Product Manager | Griddy Energy, Los Angeles, CA

Jan 2020 – Nov 2020

- Led the mobile redesign of self-service features — notifications, account management, settings — reducing related support tickets 40% in 6 months
- Collaborated with senior PMs to launch a cost-forecasting tool using Dark Sky's Weather API, reducing customer energy bills by up to 25% within 6 months

Member Experience Associate | Griddy Energy, Los Angeles, CA

Jul 2019 – Dec 2019

- Supported a greenfield team's expansion into three new regulated markets (Pennsylvania, New Jersey, Maryland) during discovery, managing Scrum artifacts and mapping backend infrastructure to surface technical dependencies
- Served as voice of the customer, resolving 60+ daily support requests and converting frontline insights into prioritized product feedback, while holding a >95% satisfaction rating for 6 consecutive months

SKILLS

Product: A/B Testing, Go-to-Market, PRDs, Prioritization, Roadmapping, Stakeholder Management, User Research

Technical: AWS, GitHub, Claude Code, Cursor, REST APIs, SQL

Analytics & Tools: Airtable, Aspera, Braze, Brightcove, Figma, Google Analytics, Jira, Looker, Mux, New Relic

EDUCATION

B.S. in Microbiology, University of California, Santa Barbara

2015

ADDITIONAL

Interests: Surfing, backpacking, listening to music, building AI-assisted product workflows
