SUMMARY

Product manager with 5 years of experience taking media supply chain and SaaS products from 0-to-1 through scale, with deep expertise in content operations and platform ecosystems for studios and content partners. Full-stack across the product lifecycle, from user research and PRDs to hands-on prototyping with Cursor and Claude Code, to move fast and ship in ambiguous, resource-constrained environments.

EXPERIENCE

Product Manager | Wonder Project, Los Angeles, CA

Apr 2023 – May 2026

- Built Wonder Project's media supply chain from 0-to-1, designing the delivery, ingestion, and metadata architecture (Aspera, S3, Brightcove, Cloudinary) that has processed 3000+ hours of licensed and original content to date
- Defined and iterated the first delivery spec detailing A/V, timed text, artwork, and 80+ parameter metadata schema in response to studio partner feedback, establishing the spec that every studio partner has onboarded against
- Led cross-functional technical onboarding for the Amazon Prime Video Channel launch, closing spec gaps in XML generation, timed text, and A/V to meet Amazon's certification SLAs
- Drove legal product strategy for compliance with CCPA, GDPR, and VPPA, architecting a custom build that extended a \$20/month vendor tool to deliver full consent management, DSAR workflows, and privacy preference controls
- Shipped 5 core features (Profiles, Downloads, Sign Up, Customer Lifecycle, Settings) for a 7 platform SVOD beta (Roku, tvOS, Fire TV, Google TV, iOS, Android, Web), backed by 50+ hours of competitive and customer research
- Adopted Cursor and Claude Code into the product development workflow for media supply chain enhancements, cutting time from ideation to working prototype by 50%

Project Manager, Scientific Programs | Sensor Bio, Los Angeles, CA

Jan 2021 – Nov 2022

- Led a Fortune 500 pharmaceutical client and internal teams through end to end project lifecycle, translating complex clinical research requirements into product specs, delivering 2 white-label clinical research solutions totaling \$1.6M in contract value

Associate Product Manager | Griddy Energy, Los Angeles, CA

Jan 2020 – Nov 2020

- Led the UX/UI re-design of Account & Self-Service features, increasing CSAT and NPS scores and reducing related support tickets 75% in 6 months
- Collaborated with senior PMs to launch a cost-forecasting tool using Dark Sky's Weather API, reducing customer energy bills by up to 25% within 6 months

Member Experience Associate | Griddy Energy, Los Angeles, CA

July 2019 – Dec 2019

- Assisted greenfield team for discovery phase development into new market (Pennsylvania, Jersey, Maryland) with distinct regulatory hurdles by managing all Scrum artifacts and creating flowcharts and maps of the backend infrastructure
- Resolved 60+ daily support requests, maintaining a >95% satisfaction rating for 6 consecutive months
